2.About the Event

Introduction

Tree Plantation program is carried out for awareness about importance of tree in society. This One day event was informative and useful to students and faculties. Also event made them aware about recent challenges of environment. This event also inspires people attending this event.

Information Sharing

The program was started with the knowledge sharing among participants. The discussants in the meeting said that trees are very important in our life and there is a spiritual relationship between human beings and trees. Human beings get many services from trees which sometimes cannot be measured in term of economic calculation. They further said that one should plant trees in fallow lands and when one tree is chopped down two seedlings of trees should be planted.

Plants were collected from Bhavda Nursery, by NSIT Volunteers. Proper place was identified for plantation in Garden situated in the college premises and made it ready for plantation. (Around 50 Plants of seven Medicinal plants variety like; Amala (*Emblca officinalis*), Baheda (*Terminalia belerica*), Aritha (*Sapindus trifoliatus*), Saptaparni (*Alstonia scholaris*), Garmalo (*Cassia fistula*), Brahmi (*Bacopa monnieri*) and Barmasi (*Vinca roseus*) were planted.

After good time of information sharing by gardener and his team, faculties and students collected saplings from the gardener and volunteer for plantation at the pre determined place. Also they shared their experiences about their plantation of trees. In addition to this, importance of trees on earth and in atmosphere was discussed among participants. Some of the participants also shared their creative ideas for developing green environment at their home.
