Project Title: Dream Path for career Guidance

Abstract:

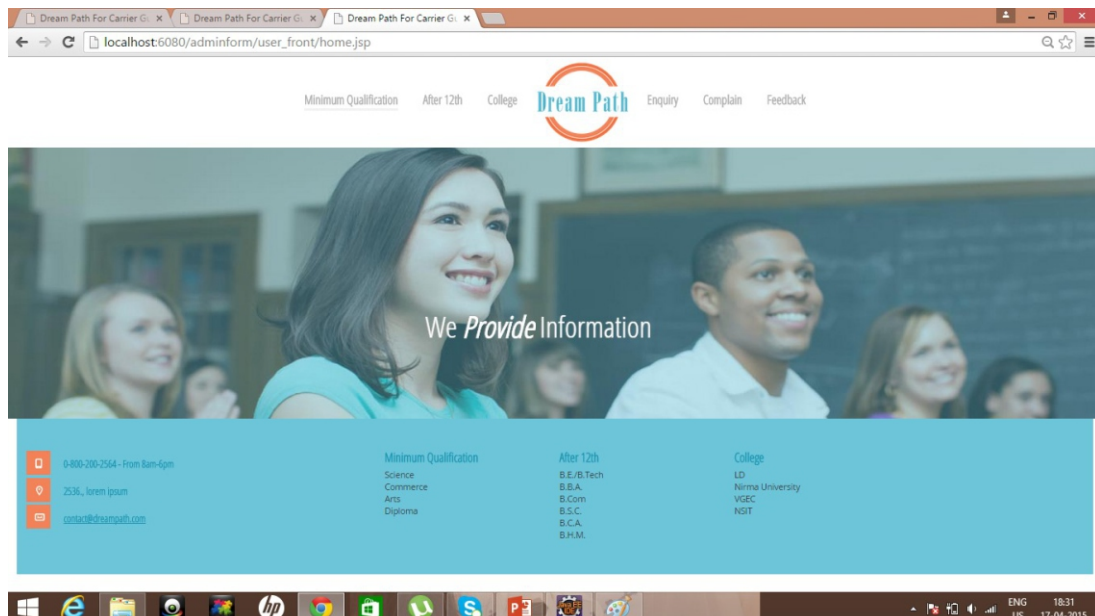

Dream Path for Career Guidance will provide facility to user to find information about streams and colleges. In this site any person who is interested to know about any stream can register himself in the same way if any organization want to register itself with this site that can also register.

USER:

User will register himself. After registering himself he/she can find information about any stream and can give feedback or can post enquiry.

ADMIN:

Admin will manage all streams and minimum qualification entered by user. It will manage feedback, enquiry and complains. It will also manage Advertisement.

Advantages of our project are:

- It will help students to give information about all streams.
- It will also help parents to guide their Children.
- It will be helpful to know best colleges.

Software Requirements:

- Development Framework: Hibernate
- Front End Tool: Eclipse LUNO
- Programming Language: java
- Technology: HTML/XML/CSS
- Back End: Jsp, Servlet
