Abstract

This Rotary Library is windows 8.1 metro application. It will provide the members with all kind of facilities that are required by them for their convenience. This Windows 8 web application is to serve the members of Rotary Club, Bhavnagar to deal with library books. User can request for book or can return the book at any time on one click. If user wants to donate the books then one can submit the books by requesting through this application. Data will be managed from website. Authorized person will manage all databases. This application will change manually system into computerized system. It serves as mobile library system for rotary club members only. Members can issue, review and request books available in rotary library. To manage this entire system a web site interface should be provided to authorized person from among rotary club members. Application provides security to user's data. This application provides e-mail notification facility to users.
