Project Title: E-Commerce Art Gallery

Abstract: E-Commerce Art Gallery is the practice of distributing or providing access to digitally stored information, such as multimedia (like images). It may be implemented through a variety of ways. Here, user can upload photo and like & comment products. Admin can upload products and create events for users. We are offering people to purchase multimedia files like photos and like them.

Project Photo:

Software used: **PHP, Apache, Windows, MySQL, Dreamviewer.**

Project Application:

1. Online photo selling
2. Event ticket booking
3. Browse hand made photos of different artists.
4. Save favorite photos to gallery
