Project Title:-Smart Traveler

Abstract:-

Smart Traveler is basically an app for day to day use for people who love to travel. It is an all in one app.

This app is especially for the people who are shifting to going to new place or city for any business purpose or just to travel.

This app will consist of city maps, history of city, its hot attractions, its eye catching places, booking tickets for bus, train etc., booking for hotels and many more will be added soon.

This app will help people to know everything about the new city they are going to visit.

This app will provide a web based platform for City to be showcased for all it has in terms of unique business, places to see, use local transport for new traveler, things which will be opened soon etc.

It's very user friendly and easy. In this application visiting places will be highlighted.

This system can be used by any tourist coming to the city as well as by those who are looking for any information related to city.

It is a full security based process as user's IPV4 & IPV6 addresses are captured on his/her Login.

Software used:-

Microsoft Visual Studio 2013 with blend

Project Application:-

- Searching and knowing any city
- Travelers
- Tourists

Approx. Project Cost:-N.A.
