Project Title:- Tool Packaging System

Abstract

Initially in manual warehouse workers have to do so much tedious work like count the spare parts and have to bring that on the counter. So it consumes too much of time and work load of workers and thus lead to pay more to the workers. By using tool packing system we can avoid the problem faced in manual warehouse.

Software used

Atmel studio

Major Hardware Components Used

ATMEGA16 avr controller

16*2 LCD

IR Sensor

Proximity Sensor

Solenoid lock

Project Application

- In an assembly line & packaging industry
- In manual warehouse & organization

Project photo

Project cost: 15000 rs
